IJN CATH LAB SYMPOSIUM 2016
IJN AUDITORIUM 8th OCTOBER 2016

INTRODUCTION

With the combination of sophisticated equipment, experienced operators and modern drug therapy, cardiovascular intervention has evolved into an effective nonsurgical modality for treating patients with heart and vascular diseases. Ongoing technical advances are allowing more patients with complex coronary disease such as chronic total occlusions (CTOs), diseases, endovascular, pacemaker implantations and heart failure to be successfully treated.

Improvements in catheter techniques and procedures strategies, development of new devices and medications have increased the success and decreased the complications of these procedures. IJN College with the support of Cardiology Department is offering a one day IJN Cath Lab Symposium to update participants with the latest techniques, technology and strategies to improve success while performing intervention procedures.

LEARNING OBJECTIVES

At the end of the symposia participants are able to:-

- Compare and contrast the current practices and controversies surrounding advanced coronary and vascular interventions.
- Appraise the newest technologies and treatments
- Apply evidence-based medicine from clinical trials during revascularization decisions
- Familiarize with the latest tips and tricks in advance cardiovascular procedures.

BENEFICIAL TO

Cardiologists, Young Physicians, Clinicians with an interest in Cardiology, Cath Lab Nurses, Allied Healthcare Staffs and Industry Personnel.

AWARD

- Certificate of Attendance
- CPD Points

THE FACULTY
