CHEST DRAIN MANAGEMENT

Workshop

19th August 2017

INTRODUCTION

This chest drain management workshop has been developed to allow Registered Nurse (RN), Medical Assistant (MA) and Surgical Assistant (SA) to improve their knowledge and skills in the care and removal of chest drains either they are in the Operation Theater (OT), Intensive Care Unit (ICU), Coronary Critical Care (CCU), Paediatric Intensive Care Unit (PICU), Emergency Department or General Ward. This clinical skills workshop will support practitioners to improve performance in their clinical setting. The participants are encouraged to be analytical, decisive with avid observation using cognitive skills.

OBJECTIVES

At the end of this workshop, participants will be able to:-

- Discuss the anatomy and physiology of the chest relating to chest drainage.
- Discuss the physiology of breathing.
- State the condition which required insertion of chest drainage.
- Explain the safe triangle.
- State the techniques of chest drain insertion.
- Explain the concept of Under Water Seal Drainage (UWSD).
- Identify the criteria for removal of chest drain.
- Demonstrate the correct and safe technique of chest drain removal to avoid complication.
- Enhance the skill to evaluate level of confidence in the management of chest drain.

METHODOLOGY

- Lecture
- Lecture Demonstration
- Video Lecture

TARGET GROUP

Registered Nurse (RN), Medical Assistant (MA) and Surgical Assistant (SA)

AWARD

A certification will be provided by the IJN College.
