PHLEBOTOMY WORKSHOP

29th March 2018 | IJN College

INTRODUCTION

The goal of the Phlebotomy Workshop is to minimise errors that may cause any harms to patients, either directly or indirectly. This can be achieved when a qualified and certified Phlebotomist establishes, implements and practices quality control on his own work.

The workshop also aim to reduce the number of unacceptable specimens, especially due to clotting and haemolysis, misdiagnoses example high potassium of haemolysis vs. true hyper kalaemia, delays in diagnoses, and not to mention the extra costs incurred due to repetition of sepciment collection and possible litigations.

This program also helps to provide continuing learning opportunities and educate medical assistants, nursing, and laboratory personnel as well as young medical practitioners and assists the organization in improving specimen quality and safe collection.

LEARNING OBJECTIVES

At the end of this workshop, participants should be able to:

- Appreciate the value of standard in the correct technique of venipuncture, micro sampling and transport of blood samples.
- Minimise errors that may cause any harms to patients, either directly or indirectly.
- Reduce the number of unacceptable specimens.
- Demonstrate the importance of standard practice on phlebotomy procedure to prevent any complication.

METHODOLOGY

- Lecture
- Practical

BENEFICIAL TO

- Doctors
- Nurses
- Medical Assistants
- Medical Lab Technologists

AWARD

Certificate of Participation

PROGRAMME
