

DIPLOMA IN MEDICAL & HEALTH SCIENCES

(N/0913/4/0001) (03/28) (MQA/PA 12882)

SUMMARY

The Medical and Health Science Diploma Program is designed to train competent multi-skilled health professionals to meet the needs of an ever-expanding allied health field. The diploma program is a full-time day program, only a few classes are taught online. The program combines both formal education and practical experience to help students master the complex body of knowledge and specialized skills necessary for a successful career. Students are trained in the areas of basic medical sciences and professional modules such as medicine, emergency medicine, surgery, public health, pharmacology, behavioural science and nursing. The students will experience learning in the classroom, practical sessions, hands-on activities combines with student self-directed learning. The students undergo clinical placements to enhance the clinical knowledge and competencies as well as skills in the major areas of medical, surgical, emergency, pre-hospital care and many others. This program prepares individuals for careers that are in high demand in the healthcare industry.
