A GLIMPSE OF IJN COLLEGE

IJN College (IJNC) is an affiliate of the premier provider of cardiac healthcare, Institute Jantung Negara (IJN) Sdn Bhd. IJN is a leading heart specialist institution in the region, committed to deliver advanced standards in cardiovascular and thoracic medicine for adult and paediatric heart patients. IJNC was established on 16th January 2007 and is a post-registration college approved by the Ministry of Higher Education (DK135 (W)). Since its inception it has been providing several academic training and higher education opportunities specialized in cardiovascular and thoracic sciences to various healthcare professionals in the region.

Our mission is to provide a holistic learning experience for healthcare professionals which lays equal emphasis on the attainment of technical expertise and the personal growth of the individual. We provide training and higher education opportunities, primarily in cardiac care: including cardiologist, cardiac surgeons, anesthesiologists, cardiovascular technologists, angiographers, cardiac critical care nurses, cardiac perfusion technologist, physiotherapists and non-clinical training as well. IJN College has also played roles in developing human capital capability by training the non-clinical groups too.

We have privileged program for multidisciplinary health professionals' in Graduate Certificate Cardiovascular and Thoracic Sciences (GCCVTS) and prepare students for a career in their respective specialized areas globally.

PROGRAM OVERVIEW

Advanced Diploma in Cardiac Nursing Programme (ADCN) is a skill based higher learning programme that implements a one (1) year full time academic calendar with three (3) semesters. Each semester will be conducted within a 17 weeks period. This programme is structured with regards to standard guidelines of Malaysian Nursing Board and provisionally accredited by Malaysian Qualifications Agency (PA 9097).

The management of critically ill patients is an integral part in healthcare practices hence it prepares students to care patients with cardiac intensive nursing competencies based on theoretical and clinical subspecialty. The program introduces students with: pathophysiology of various cardiac conditions, cardiovascular assessment from a medical and nursing perspective, risk stratification, early and advanced treatment for cardiac diseases, diagnostic techniques, evidence based professional practices, rehabilitation processes, pharmacological management and medical and surgical interventions for the cardiovascular disorders.

This advanced programme allows students to enhance their knowledge in an educational environment, under the supervision of committed trained professionals in specialized clinical placements. Upon completion of the programme students will be equipped with advanced skills and knowledge of safest and highest quality care for cardiac patients. It will enhance their nursing professionalism with leadership qualities, communication skills, teamwork and critical thinking abilities.

PROGRAMME EDUCATIONAL OUTCOMES

- Transform current scientific and technological knowledge and skills required for the applications of quality Cardiac Nursing Care.
- Excel in management and leadership abilities by inculcating critical thinking decision making and communication skills with team work based on integrity and professionalism.
- Demonstrate continuous improvement through self-directed and social learning for personal and professional development.
- Utilize IT effectively and in obtaining evidence based practice information for clients care.
- Advocate positive attitudes based on value and ethics necessary in fulfilling his/her responsibilities towards the clients and society.
